

ASTRONOMY, ASSOCIATE IN SCIENCE

Astronomy is the branch of science which studies celestial objects and processes. Astronomers draw on many other disciplines to explain celestial phenomena including mathematics, physics, and chemistry. The Associate in Science degree in Astronomy at Monterey Peninsula College gives students a foundation in the introductory science and math which are needed for further study in Astronomy or a related field.

Learning Outcomes

Upon successful completion of the program, students will be able to:

- Use the scientific method to investigate phenomena in the natural world and use concepts, experiments, and/or theory to explain them.

Associate in Science Degree Major Requirements

Code	Title	Units
Required Core		
Select at least 18 units from the following:		18
ASTR 10 & ASTR 10L	Introduction to Astronomy and Introduction to Astronomy Laboratory	
CHEM 1A	General Chemistry I	
CHEM 1B	General Chemistry II	
MATH 20A	Calculus with Analytic Geometry I	
MATH 20B	Calculus with Analytic Geometry II	
PHYS 3A	Science and Engineering Physics I	
PHYS 3B	Science and Engineering Physics II	
TOTAL MAJOR UNITS		18
Additional Requirements		42
Complete Competency Requirements, general education pattern (MPC General Education, CSU General Education, or IGETC), and electives, if needed, for a total of 60 degree-applicable units. ¹		
Total Units		60

1

Contact an MPC counselor for major preparation at specific institutions.

Please refer to the graduation requirements section of the Catalog for information about degree and certificate requirements including Reading and Writing, Mathematics, Information Competency, and General Education requirements.
