

CHEMISTRY, ASSOCIATE IN SCIENCE FOR UC TRANSFER

The Associate Degree for UC Transfer has the goal of creating a Transfer Pathway for students to transfer into the University of California system to complete a bachelor's degree. The Pathway provides a clear roadmap and preparation for UC's most sought-after majors, comprising a single set of courses to take for completion of lower-division major requirements that transfers to any of the nine UC undergraduate campuses.

The Transfer Pathway program permits students to defer for completion after transfer four courses in the IGETC pattern (two in Area 3 Arts and Humanities, and two in Area 4 Social and Behavioral Sciences). Admission to the University of California is competitive; successful completion of the Associate Degree for UC Transfer does not guarantee acceptance to a UC campus.

The following Associate Degree for UC Transfer requirements must be completed to earn the degree:

1. Minimum of 60 UC-transferable semester units
2. Minimum grade point average (GPA) of 3.5 in all UC-transferable coursework
3. Completion of a minimum of 18 semester units as detailed in the Major Requirements
4. Completion of all courses in the major with a grade of C or better (or a "P" if the course is taken on a "Pass/No Pass" basis)
5. Certified completion of the Intersegmental General Education Transfer Curriculum (IGETC) pattern
6. Minimum of twelve units completed at Monterey Peninsula College, with at least six in the major
7. Graduation competencies:
 - a. Reading and writing
 - b. Mathematics
 - c. Information competency

All students should consult with a Counselor to discuss transfer pathways and specific campus admission requirements. Visit MPC's Counseling website for more information about Counseling services provided by MPC and to connect with a Counselor.
