

ENGINEERING, CERTIFICATE OF ACHIEVEMENT

Engineering involves the use of science and mathematics to develop products, systems, or services that benefit society. This program prepares students for transfer into an Engineering baccalaureate program by providing coursework aligned with three key discipline clusters:

- Mechanical, Civil, Aerospace, and Manufacturing
- Electrical
- Computer and Software

The Engineering Certificate of Achievement is intended to provide the shortest pathway to transfer with the greatest amount of major preparation, and includes a minimal set of General Education classes required for admissions to most university engineering baccalaureate programs.

Since individual university engineering transfer requirements differ, please confirm course selection with an MPC counselor.

Learning Outcomes

Upon successful completion of the program, students will be able to:

- Use the engineering method to solve technical problems or create products or processes.
- Use the scientific method to investigate phenomena in the natural world and use concepts, experiments, and/or theory to explain them.
- Analyze and evaluate complex issues or problems, draw reasoned conclusions and/or generate solutions, and effectively communicate their results.
