

# SOCIAL WORK AND HUMAN SERVICES, ASSOCIATE IN ARTS FOR TRANSFER

The Associate in Arts in Social Work and Human Services for Transfer degree program prepares students for rewarding careers as program specialists, leaders in community outreach, life skills, drugs/alcohol and mental health counselors, eligibility technicians, and social workers. Careers in social work and human services include state and local government systems, non-profit organizations, and private social services agencies. Career advancement is available with experience and additional training, while courses in the transfer program may lead to advanced degrees in Social Work, Public Health, and Human Services.

In the program, students enjoy engaging academic courses and an enriching hands-on experience in field placements, studying development, history, theory, and implementation of our society's responses to human needs. Program participants learn about key issues and problems in Social Work and Human Services and build competencies in practice interventions, resources, strategies, and technologies for the delivery of human services and social work.

The program at MPC includes exploration of strengths-based human services systems, with attention to social inequalities and sociocultural factors that influence access and experience of care. Students gain competency in effective communication, develop creativity, refine critical thinking, practice teamwork, and exercise ethics in their helping relationships. Coursework prepares students for seamless transfer into the CSU system to pursue a baccalaureate degree in health and human services, social work, counseling, community studies, or related major. Students must complete the Associate Degree for Transfer requirements to earn the AA-T degree.

## Learning Outcomes

Upon successful completion of the program, students will be able to:

- Describe and demonstrate standards of professional behavior, confidentiality, and respect required in the field of human services.
- Explain how to use a strength-based and self-reliance approach in the study and delivery of human services.
- Apply concepts and theories of human services in performing effectively as part of a team when collaborating with families, agencies, and community-based organizations, while maintaining suitable values and ethics for Human Services.

## Associate in Science Degree Major Requirements

Code	Title	Units
