

PHYSICS, ASSOCIATE IN SCIENCE FOR UC TRANSFER

The Associate Degree for UC Transfer has the goal of creating a Transfer Pathway for students to transfer into the University of California system to complete a bachelor's degree. The Pathway provides a clear roadmap and preparation for UC's most sought-after majors, comprising a single set of courses to take for completion of lower-division major requirements that transfers to any of the nine UC undergraduate campuses.

The Transfer Pathway program permits students to defer for completion after transfer two courses in the Cal-GETC pattern (one in Area 3 Arts and Humanities, and one in Area 4 Social and Behavioral Sciences). Admission to the University of California is competitive; successful completion of the Associate Degree for UC Transfer does not guarantee acceptance to a UC campus.

The following Associate Degree for UC Transfer requirements must be completed to earn the degree:

1. Minimum of 60 UC-transferable semester units
2. Minimum grade point average (GPA) of 3.5 in all UC-transferable coursework
3. Completion of a minimum of 18 semester units as detailed in the Major Requirements
4. Completion of all courses in the major with a grade of C or better (or a "P" if the course is taken on a "Pass/No Pass" basis)
5. Certified completion of the California General Education Transfer Curriculum (Cal-GETC) pattern
6. Minimum of twelve units completed at Monterey Peninsula College, with at least six in the major
7. Graduation competencies:
 - a. Information competency

All students should consult with a Counselor to discuss transfer pathways and specific campus admission requirements. Visit MPC's Counseling website for more information about Counseling services provided by MPC and to connect with a Counselor.
